Biomaster protected

Harfield's Biomaster protected tableware is a response to the growing need to do more to tackle disease-causing bacteria and viruses. We can now confirm that Biomaster is active on substrates against SARS-COV-2, the virus that causes Covid-19.

1 

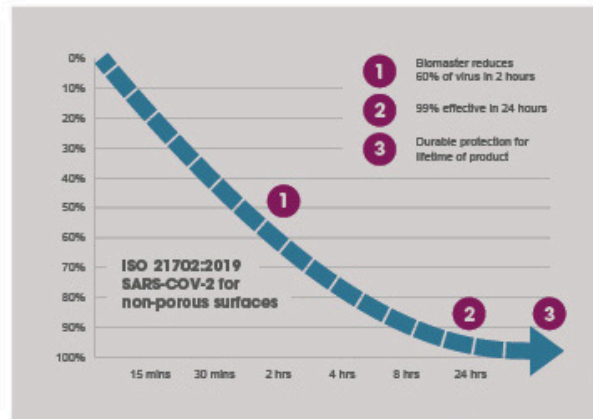

Biomaster binds to the cell wall disrupting growth.

2 

The Biomaster ions interfere with enzyme production stopping the cell producing energy.

3 

Biomaster interrupts the cell's DNA preventing replication.

For illustrative purposes only, actual reduction rate varies depending on material and Biomaster addition rate.
